Finescale dace	

Physical Characteristics

Area - 340 acres

Temperatures:

Maximum depth - 95 feet

Surface - 73°F

90 feet - 43°F

Principal fisheries: Lake trout

Lincoln Pond is located east of Big Buck Mountain. A small inlet enters the north shore of the pond and its outlet, Lincoln Brook, flows southwest into Aziscohos Lake. The pond's shoreline is mostly undeveloped.

Water quality in Lincoln Pond is good for coldwater gamefish. Lake trout were introduced in 1956 and the fishery for them is currently maintained through natural reproduction. The pond is not stocked.

Lincoln Pond is accessible via a gravel side road off the Lincoln Pond Road. The pond is open to fishing in the summer months with the use or possession of live fish as bait being prohibited. The pond is closed to ice fishing.
